ErrorContent property, 627–628	RoutedEventArgs class, 121
ErrorException property, 872	RoutedEventArgs class, table of properties,
ErrorProvider control, 1021–1022	125
Escape key, 177	sharing between classes, 121
event handlers	three types of routed events, 124
using attributes to attach, 44	tunneling events, 124, 131, 273
wiring up, 26	UIElement class, 121
event handling, 493	using -= operator, 123
event routing, 44, 123	using event wrapper, 121
AddHandler(), 120, 129	using RemoveHandler() helper method, 123
attached events, 129	wiring up attached event in code, 130
bubbled image click, code example, 126	WPF content model and, 119
bubbling events, 124, 126	WPF event model, 120
button control and Click event, 129	wrapping of routed events by .NET events,
connecting event directly by calling	120
AddHandler(), 122	event signatures, 121
connecting event with delegates and code,	event triggers
122	attaching actions to property trigger, 443
ContentElement class, 121	attaching triggers with style, 442
creating appropriate delegate type, 123	BeginStoryboard action, 440
creating delegate object with right signature, 122	creating event trigger for MouseEnter and MouseLeave events, 521
defining and registering, 120	creating property trigger that triggers
definition of, 119	storyboard, 442
detaching event handler, 123	defining, 440
direct events, 124	EventTrigger.SourceName property, 447
ensuring each button has Name property set	launching animation, 323
in XAML, 130	returning element to its original state, 324
event signatures, 121	supplying series of actions to modify
event wrapper, 120	control, 323
firing sequence for tunneling and bubbling	Triggers collection, 442
events, 131	using to attach animation, 442
handling suppressed events, 129	using to control animation storyboard, 439
identifying routing strategy of event, 133	using Trigger.EnterActions and
KeyDown event, 132	Trigger.ExitActions, 443
marking tunneling event as handled, 133	waiting for specific event to be fired, 323
MouseDown event, 124	event wrapper, 120
MouseEnter event, 124	EventManager class, 558
MouseEventArgs object, 121	events

definition of, 119	FileRegistrationHelper class, 232
editing, 748	FileStream class, 47, 978
EventTrigger class, 321, 874	FileViewer class, 224
EventTrigger.SourceName property, 447	Fill property, Shape class, 335
ExceptionValidationRule, 623	FillBehavior property, 435, 444
Execute() method, 268–269	FillRule property, 347, 378
Executed event, 273	Filter event, 696
ExecutedRoutedEventArgs, 273	Filter property, 697
ExpandDirection property, 196	FindAddIn() method, 1068
Expanded event, 730	FindAncestor mode, 262
Expander control, 171	FindLogicalNode() method, LogicalTreeHelper
combining with ScrollViewer, 197	class, 503
ExpandDirection property, 196	FindPrimes() method, 1046
implementing lazy load, 196	FindResource() method, 312
IsExpanded property, 195	FirstDayOfWeek property, DatePicker class, 211
synchronizing other controls with, 196	Fixed Decimal data type, 646
use in online help and on web pages, 195	fixed documents
window size and expanding content, 197	browsing inner contents of XPS file, 975
Explicit update mode, 260	creating and viewing XPS documents, 974
explosion effect, 497	definition of, 935, 974
Exponent property, ExponentialEase class, 456	DocumentViewer, 936
Exponential data type, 646	features of, 974
ExponentialEase class, 456	printing documents without alteration, 936
Expression Blend tool, 25, 388, 395, 472, 542	printing fixed documents using
design-time behavior support in, 330	ApplicationCommands.Print, 975
developing behaviors in, 330	using DocumentViewer to display XPS
editing template for any control, 513	document, 975
getting support for behaviors, 325	XPS (XML Paper Specification), 935, 974
using behaviors, 325	XpsDocument class, 975
Expression Design tool, 25, 345, 397	FixedDocumentPaginator class, 999
Expression.Interactions.dll assembly. See	FlipButton part, 572
